DOUBLETRAC FEATURES AND BENEFITS FOR RETAIL APPLICATIONS

DURABILITY

- 316L Stainless steel primary good for all blends of ethanol, bio-fuels and DEF, no need to change out pipe for future fuel, additives or ethanol blends
- Mechanical fittings do not require special tools, no welders, benders, sanding glue kits etc. - stainless fittings available which contain both primary (metal-to-metal seal) and secondary seals and are reusable
- Mechanical fittings passed two hour fire test
- Interstitial space is 38 times faster than the UL minimum requirements
- .000001 GPH permeation rate, exceeds the allowable .05 GPH by 1000 times – DoubleTrac doesn't permeate!

EASE OF INSTALLATION

- Available sizes 1", 1.5" and 2" - offered in rolls and sticks and can be ordered by the foot
- Fittings available with Quick Connector style ends
- Traceable when underground without a need for a tracer or locator
- Can be installed in all types of weather - Bend radius at 20°F for 1" = 12", 1.5" = 24" and 2" = 32". Less memory than non-metallic flex pipe
- 30 year warranty on pipe and fittings for USTs with or without chase pipe
- 15 year warranty on pipe and fittings for ASTs
- Contractor on-site training included
